AI Summary

This document provides an introductory overview of environmental studies, defining the environment and its segments (atmosphere, hydrosphere, lithosphere, biosphere). It emphasizes the multidisciplinary nature of the field—integrating science, law, and social studies—and outlines the wide scope of the discipline, including natural resource management and career paths like green advocacy and environmental consultancy. It highlights the global importance of addressing environmental degradation, sustainable development, and the pressures caused by industrialization and population growth.
